

Season 2021/22

We have been accepting bookings for the coming winter season since February. The first dates are already fully booked or only available on a waiting list. Since many freeriders had to bury their plans for the past winter, they are now making sure they have a place for the next year. You can see a more or less current booking status on the website.

Locations

In Adjara we will continue to operate our **Alp Hut** as a backcountry alternative - just one group in our own cosy mountain hut.

In Bakhmaro we will finish our new base by summer: **The PIONEERS** – a guest house with double, twin and triple rooms with private bathrooms and balconies. The house has central heating, panoramic windows in the dining area and an open fireplace in the living room. In the basement there is a sauna with relaxation room, a small room for stretching and a room for massage.

In addition, we offer a simple guest house in Bakhmaro with bunkbeds and shared bathrooms (**budget**) in order to be able to provide an inexpensive alternative.

Whether we can start a new **project** depends largely on the booking situation. If we have enough bookings together by summer that we can finance and risk a new project, we will set up a simple accommodation in an undeveloped valley and accommodate a test group there. We have already scouted the area.

EarlyPayment-Special

We will keep our early payment offer until **June 30th**:

If the total amount is transferred directly (20% down payment + final payment in one transfer), we grant a discount of 10% on the final payment. Otherwise, the balance is due 30 days before arrival.

Summer 2021

We will start operations in **The PIONEERS** from July. This means we will be able to offer the most comfortable accommodation in Bakhmaro this summer.

Our offer is aimed primarily at domestic vacationers, but of course international travellers are also welcome. In addition to the operation of the guest house, we will set up an **Outdoor Activity Office** with a team of young locals so that we can offer daily leisure activities - in summer hiking, mountain bike and horse riding and in winter ski-tours and snowshoeing.

If international tourists are interested, we can offer guided hiking, mountain bike and horse riding tours in the mountains around Bakhmaro from the end of August. From 29/08 to 04/09/2021 we will definitely start with an **adventure bike scouting tour** to explore the existing alpine and forest trails around Bakhmaro. After that tours would then be possible until the beginning of October.

Our alp hut in Adjara will be open for overnight stays from the end of June. Above all, this offers us the opportunity for multi-day tours (hike, bike or ride), for example from the Goderdzi Pass to the Black Sea or from Bakhmaro to Batumi. With our solar system, we can offer an environmentally friendly charging station for e-bikes.
