

Season 2021/22

The booking period is divided into two parts. We get most of the bookings during the season and then until May. Especially repeaters book during this time and larger groups that are not so flexible in terms of time. The second wave of bookings does follow from mid-August. In these weeks, individual bookings usually follow, which are more flexible in terms of time. From October onwards there are still a few last minute requests coming in and interest in the pre-season (December) is increasing.

The first snow has already come.

Availability

The freeride travel market has not yet recovered from the Corona crisis. In particular, there is a lack of bookings from overseas. We still have a lot of free places in Bakhmaro in the high season:

The PIONEERS:

- 22/01-29/01/2022 – 3 places
- 12/02-19/02/2022 – 1 place
- 19/02-26/02/2022 – 3 places
- 26/02-05/03/2022 – 4 places

Budget

- 08/01-15/01/2022 – 8 places
- 29/01-05/02/2022 – 6 places
- 12/02-19/02/2022 – 6 places

Spontaneous people can still find vacancies in Bakhmaro. In December there are still a lot of free weeks, but December is usually booked later anyway.

And we even have still availability in **Adjara** in the main season:

- 26/02-05/03/2022 – 2 places

Season Preparations

As every year at this time, the preparations are in full swing. The machines need to be serviced - this year we have to take special care of the cabins, which have suffered badly in previous years. Our houses – also the rented ones - have to be partially renovated.

Firewood is hooked and stored. Diesel is brought to Adjara and Bakhmaro and stocks of spare parts and lubricants are replenished. The kitchen crew makes jam, prepares lobio and pickles. With us everything is homemade whenever possible. It's a lot of work, but you can taste the difference!

The PIONEERS

In August we were able to rent out the first rooms in The PIONEERS. We have also set up a pavilion with a beautiful panoramic terrace as a café in front of the house and were surprised by the very successful operation in summer. There are still some local tourists visiting Bakhmaro now. The remaining 4 rooms will be ready by winter.

Biwakbus

After we stopped this small project last year because the travel market had totally collapsed, we resumed work in September. We'll be driving the bus into the mountains in October and I'm already looking forward to the first night in the bivouac.

Projekt X

Unfortunately, we could not continue the new project because the demand for freeride trips is still low. We simply haven't received any bookings. Now we hope for next year and that the market will recover. We have so many great ideas...

It was a summer with not many nice days for hiking.
